enzyme inhibitor activity		endopeptidase inhibitor activity				heparan sulfate proteoglycan binding				
endopeptidase enzyme inhibit regulator activity			peptidase or activity regulator activity			heparan proteoglyc heparin binding	proteoglycan		lipoprotein particle receptor binding immunoglobulin receptor binding low-density lipoprotein particle receptor binding	
peptidase inhibitor activity		serine–type endopeptidase inhibitor activity		lipa inhik acti	oitor	antigen b			inding	
serine-type endopeptidase activiserine- endopeption serine-typactivi peptidase	otidase Itysphatidylinositol phosphate phosphatase activity sterol transporter activity		lipoproteir immunoglobulin particle immunoglobuling binding protein-lipid		organic acid binding organic acid binding oxygen binding		haptoglobin binding	oxygen carrier activity		
cholesterol transfer activity			complex	binding		quaternary group b	quaternary ammonium bindjngup binding		sulfur compound binding	complement binding
-cholesterol transter sterol transfer activity			antioxidar antioxidan activity	t activity	perpxidase Vacuum	heme heme b binding	tetra indir bii	apyrrole 1 g nding	amyloid-beta binding	tau protein binding
